

Energy Policy

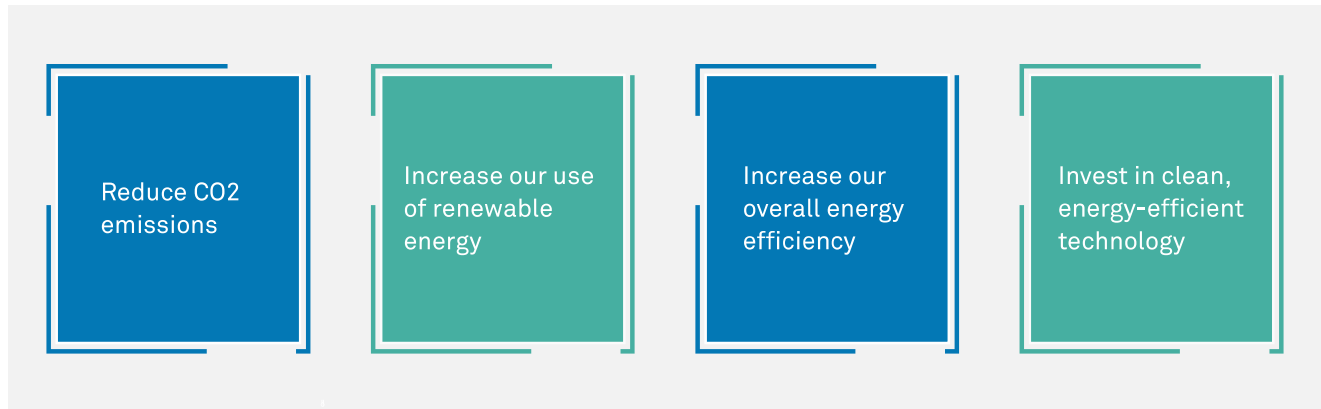

Wipro is committed to optimize its energy footprint to support a sustainable world. We proudly integrate this commitment into our company culture and corporate values.

Wipro continuously improves its energy performance through a strategic action plan that is regularly

reviewed and updated annually. We have defined Energy Performance Indicators and set targets for ourselves in accordance with ISO 50001.

This policy sets the framework for managing our energy consumption and driving various initiatives to support the following goals:

In pursuit of these goals, Wipro is committed to:

-  Responsible energy consumption and improving energy efficiency throughout all our sites
-  Purchasing energy-efficient services for our facilities and equipment needs
-  Net Zero goals by 2040, with a reduction in absolute emissions of 55 percent by 2030 keeping 2017 as the base line
-  Being legally compliant with applicable regulations and requirements
-  Investing in new technology that supports renewable energy sources
-  Designing our facilities for optimum energy performance
-  Considering life cycle energy costs for future business investments

We are addressing energy efficiency in all areas of our business including management, procurement, financial, technical, and more.

We will ensure that the relevant information and resources are available to achieve our objectives and targets. This policy and our energy performance will be updated as new information becomes available.
