

Wipro's Multi Domain Orchestrator for global network management

Wipro's Multi Domain Orchestrator (MDO) brings agility to deliver and manage network services in a complex multi-domain enterprise network (LAN, WAN, data center and Cloud).

- MDO brings competitive advantage of enterprise network by robust automation of underlying physical and virtual infrastructure.
- Achieve network standardization across global organization with MDO's key functionalities.
- Design and deploy network using available templates for small/medium/large sites.
- Configuration and provisioning – Deploy devices using prescriptive configurations with minimal clicks.
- Centralized policy control and user-based access management.
- Consolidated event management with ITSM correlation.

Key Benefits

Intent Based Networking with simplified network management.

Single pane of glass view for assurance, event aggregation, and policy driven provisioning across multiple domains.

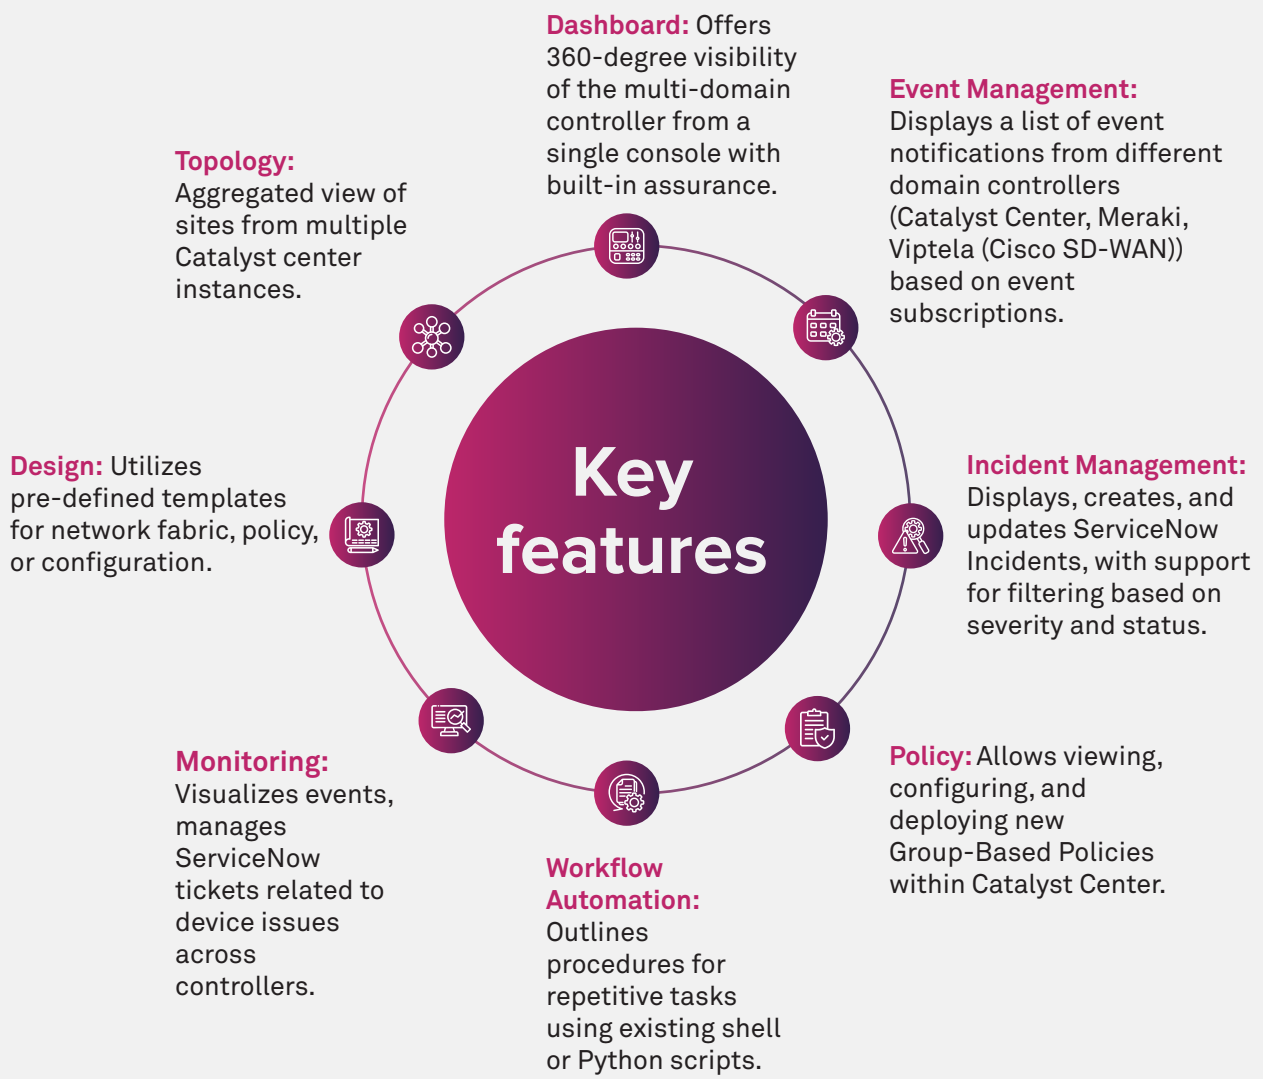

Enhance business with agile, reliable, and accurate network services through multiple domain API integration.

Automation platform to eliminate repetitive network specific activities.

Unified process for multi domain deployments reducing provisioning time.
