Legacy Microsoft Server Application Migration

Innovative one touch approach

Wipro's customized transformation approach provides automated assessment and remediation for Windows Server 2003 and 2008 application workloads with zero input from the customers' business owners.

We enable our customers to modernize the underlying Microsoft server operating system and the applications deployed to modern servers or to Docker containers.

Key Takeaways

Accelerated migration path - Rapid turnaround with minimal business impact

Reduced risk - Proven process reduces the risk by enabling significant automation of work activities

Innovative one touch approach to capture, assess, remediate, and package minimum dependency on application source files, installation instructions or subject matter experts

Consistent process - Identical process followed for all applications servers

Flexibility – Target server environments can be physical, virtual, on premise, or in the cloud

Radically reduce cost and time to identify applications and their unique configurations and assemble the installer objects and information required to remediate them

Key Benefits

- Eliminates discovery risk
- Minimizes cost and time
- Enables scalable and repeatable delivery
- Supports all modernization use cases
- Reduces FTE efforts

Features

- **Automatic capture and assessment** of the current state of the application portfolio on the legacy Windows 2003/2008 servers

- **ZERO/Minimal input from business/application owners** - Minimum dependency on application source files, installation instructions or subject matter experts

- **Full app compatibility analysis** with application dependencies, data platform dependencies application interconnections, server interconnection, and local and user permissions

- **Modernization based on assessment report generated:** Server applications assessed as amber or green can be remediated and migrated with Wipro's solution to run on a modern server OS with 100% predictability

- **Flexible target:** The target can be physical, virtual, any cloud, or Docker containers

- **Automated packaging** for any cloud deployment, automated MSFT standard packaging, automated AWS EMP packaging and automated packaging for Docker

Minimum dependency on application source files, installation instructions or subject matter experts

Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO) is a leading global information technology, consulting and business process services company. We harness the power of cognitive computing, hyper-automation, robotics, cloud, analytics and emerging technologies to help our clients adapt to the digital world and make them successful.

A company recognized globally for its comprehensive portfolio of services, strong commitment to sustainability and good corporate citizenship, we have over 180,000 dedicated employees serving clients across six continents. Together, we discover ideas and connect the dots to build a better and a bold new future.
